

Suction pads for packaging

Bellows suction pad SPB1 (1.5 folds)

Bellows suction pads SPB1

Our highlights...

- Flexible, adaptable sealing lip
- Corrugated geometry with a high suction pad stroke
- Suction pad features robust, reinforced main body
- "Interlocking" of sealing-lip and fold due to locking elements
- Maximised effective suction surface
- Made from wear-proof and abrasion-proof material ELASTODUR ED-65
- Optional pre-filter (250 µm filtration grade)
- Modular suction pad structure with connection system Schmalz Connector

Your advantages...

- >Excellent sealing performance when used on cardboard and rigid packaging
- >Height compensation and damping effect
- >High intrinsic stability of the suction pad in dynamic processes
- >Form-locking connection to avoid sliding of the suction pad
- >High suction force with small dimensions
- >Very low wear for a long service life; approx. 3x the service life of NBR
- >Vacuum system protection directly at the suction pad
- >Suction pads can be configured for different applications quickly and easily

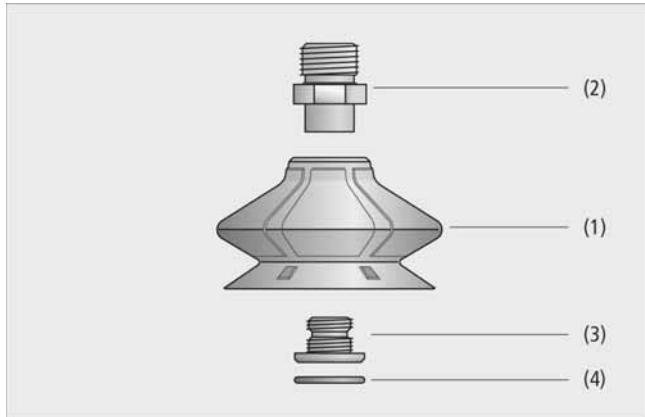

Bellows suction pads SPB1 for handling of cardboard boxes

Applications

- In cardboard box and tray erectors
- Handling cardboard and rigid packaging in top-loading and side-loading machines
- Palletising and depalletising processes
- Heavy-duty applications that require suction pads with excellent sealing and low wear

Suction pads for packaging

Bellows suction pad SPB1 (1.5 folds)

System design Bellows suction pads SPB1

Construction

- Round bellows suction pad SPB1 with 1.5 folds and soft, flexible sealing lip
- Suction pad features robust, reinforced main body
- "Interlocking" elements between sealing lip and folds for a form-locking connection when vacuum is applied
- Made from wear-proof material ELASTODUR ED-65 with a long service life
- Clip-in filter screen (4) as pre-filter
- Models with diameter up to 30 mm feature plug-in connection element for quick change of suction pad
- Models with diameter 40 mm or above feature a two-piece connection element for quick change of suction pad (1). Consisting of mounting top part (2) and lower part (3).
- All connection elements with male thread are equipped with integrated sealing

Suitability for branch-specific applications

Order procedure Bellows suction pad SPB1

Step 1: Choose suction pad		Step 2: Choose connection element	Step 3: Choose additional function
Type	Material and shore hardness	Thread	Additional function
SPB1...Bellows suction pad round	Elastodur ED-65	G1/8-F...G1/8 female thread G1/8-M...G1/8 male thread G1/4-F...G1/4 female thread G1/4-M...G1/4 male thread	Filter screen...pre-filter that clips into the suction pad
